

INTERNET

Work without limitations with Internet from Broadnet

Internet is becoming steadily more important in society and we are experiencing an explosive growth in data traffic and capacity demands. Broadnet supplies the capacity and solutions required to help your business meet these developments.

With Internet from Broadnet, you can work without limitations. With our solutions, your company will experience a simpler and much more effective workday and will be able to fully exploit the potential of the technology.

Fiber provides optimal Internet access. With our own nationwide fiber network we can guarantee the highest quality, maximum security and stability all the way into your company's data systems. With fiber from Broadnet, demanding Internet-based activities such as video meetings, streaming, Cloud-based services, file exchanges, IP telephony and home office access operate without problems.

Broadnet also offers stable access to the Internet via SHDSL and ADSL. ADSL is also available to private customers.

Internet from Broadnet is suitable for smaller and larger businesses and enterprises in the private and public sectors.

	Speeds up to		Speeds up to
INTERNET FIBER	10 Gbps	INTERNET ADSL	20 Mbps
INTERNET SHDSL	8 Mbps		

INTERNET FIBER

- Extremely high speed and synchronous speed for downloads and uploads means that fiber is the optimal Internet access
- Fiber provides the capacity required for all Internet-based communications – demanding Internet activities such as video meetings, streaming, Cloud-based services, file exchanges, IP telephony and home office access can operate without problems.
- Broadnet supplies fiber to business and public authorities throughout Norway, via Broadnet's own national fiber network
- Broadnet guarantees the highest quality, maximum security and stability, all the way to your company

INTERNET SHDSL

- Stable Internet access
- Synchronous speed for uploads and downloads
- Suitable for businesses that use telephone meetings, home office access or other activities that demand good capacity in both directions

INTERNET ADSL

- Internet access with faster download than upload speed
- Suitable for small and medium-sized businesses that use e-mail and less demanding Internet activities

ADDITIONAL SERVICES

- Service Level Agreement
- Fixed IP addresses
- Domain administration
- E-mail services
- Web hotel
